Dockerized version of sshpas

Image

[Overview](#)[Tags](#)

Docker SSHPass

sshpas is a utility designed for running ssh using the mode referred to as "keyboard-interactive" password authentication, but in non-interactive mode.

How does it work?

Usage:

```
docker run --rm -it sshpas -p password ssh -o StrictHostKeyChecking=no user@example.com "echo my-commands"
```

Docker Pull Command

```
docker pull ictu/sshpas
```
