Reply...Included in ▼Patch Sets (3/3) ▼Download ▼

What was the technical issue?:
-In Jenkins, occasionally web app build fails.
Check JIRA description for full logs
-Error: size mismatch issue occurs when FileManagerPlugin still copying data and it is still inprogress and archive task is also getting started. Eventually when taks gets completed expected size is not acheived and web app build fails.

What was the technical solution?:
-Removed FilerManagerplugin and added custom code to created tar file.
-Added code to create directories, copying required files, creating tar using archiver 3ppp

Test Cases:
