“function mock constructor jest” Code Answer’s

jest mock class

javascript by [Restu Wahyu Saputra](#)  on Nov 20 2020 [Donate](#) [Comment](#)

```
1 test("es6 class", () => {
2   const SomeClass = jest.fn();
3   const mMock = jest.fn();
4
5   SomeClass.mockImplementation(() => {
6     return {
7       m: mMock
8     };
9   });
10
11   const some = new SomeClass();
12   some.m("a", "b");
13   expect(mMock.mock.calls).toEqual([["a", "b"]]);
14 });
```

jest spy on class method

javascript by [Restu Wahyu Saputra](#)  on Nov 20 2020 [Donate](#) [Comment](#)

```
1 //class.js
2 class MyClass {
3   methodOne() {
4     return 1;
5   }
6   methodTwo() {
7     return 2;
8   }
9 }
10 module.exports = MyClass;
11
12 // class.test.js
13 test('spy using class method', () => {
14   const result = new MyClass()
15   const spy = jest.spyOn(result, 'methodOne')
16   result.methodOne()
17
18   // check class method is call or not
19   expect(spy).toHaveBeenCalled()
20
21   // expect old value
22   expect(result.methodOne()).toBe(1)
23
24   // expect new value
25   spy.mockReturnValueOnce(12)
26   expect(result.methodOne()).toBe(12)
27 })
```
