

 react-scripts 5.0.1v5.0.1
on Node.js NPM

one month ago

5.0.1 (2022-04-12)

Create React App 5.0.1 is a maintenance release that improves compatibility with React 18. We've also updated our templates to use `createRoot` and relaxed our check for older versions of Create React App.

Migrating from 5.0.0 to 5.0.1

Inside any created project that has not been ejected, run:

```
npm install --save --save-exact react-scripts@5.0.1
```

or

```
yarn add --exact react-scripts@5.0.1
```
